

Screen 3

Foldable Acoustic Reflection Filter Screen

Screen 3 is a foldable & Portable Studio Microphone Isolation Shield, creating your own personal recording booth. It is made of metal alloy and professional acoustic foams, and designed to help minimizing the undesirable hall reflection, noises and echo in order to obtain a very "dry" vocal or instrumental recording signal. This filter allows good recording results even under unfavorable ambient conditions without having to take complicated measures to reproduce studio conditions or an acoustical insulation. The foldable design saves space during transportation.

Technical data

Product size	420x310x50mm
Product weight	3252g
Material	Aluminum Panel + High density acoustic foam

Packing data

Unit packing size	220x200x340mm
Unit packing weight	3352g
Qty/ctn	4pcs
G.W/ctn	16kgs
Shipping carton size	45.5x41.5x37cm
Loading(20"/40"GP/40"HQ)	1600pcs/3300pcs/3770pcs
